APPROACH®

MYOFASCIAL RELEASE

~ ENHANCE YOUR LIFE! ~

The John. F. Barnes' Myofascial Release Approach® is considered to be the ultimate mind/body therapy that is safe, gentle and consistently effective in producing results that last. John F. Barnes, PT, is an international lecturer, author and authority on Myofascial Release. He is considered to be a visionary and teacher of the highest caliber.

WHAT IS FASCIA?

Fascia is a tough connective tissue which spreads throughout the body in a three-dimensional web from head to foot without interruption. Trauma, posture or inflammation can create a binding down of fascia resulting in excessive pressure on nerves, muscles, blood vessels, osseous structures and/or organs. Since many of the standard tests such as x-rays, myelograms, CAT scans, electromyography, etc, do not show the fascial restrictions, it is thought that an extremely high percentage of people suffering with pain and/or lack of motion may be having fascial problems, but most go undiagnosed.

Fascia Photo by Permission of Dr J.C. Guimberteau

The viscoelastic quality of the fascial system causes it to resist a suddenly applied force. This explains why the "old form" of myofascial release, which was an attempt to force a system that cannot be forced, produced pain and limited results.

WHAT IS THE JOHN F. BARNES' MYOFASCIAL RELEASE APPROACH®?

The John F. Barnes' Myofascial Release Approach® consists of the gentle application of sustained pressure into the fascial restrictions. This essential "time element" has to do with the viscous flow and the piezoelectric phenomenon: a low load (gentle pressure) applied slowly will allow a viscoelastic medium (fascia) to elongate.

Our seminars are designed to be "hands-on" experiences. The seminars listed in this brochure all build upon one another providing a logical, step-by-step, comprehensive Approach for the treatment of pain, headaches and dysfunction. The Barnes' Myofascial Release Approach® is easily learned so that you can utilize the techniques taught in class immediately upon returning to your practice.

Discover how this truly unique Approach can help you to develop the skills and confidence to provide consistent results for your patients / clients while adding fulfillment and revitalizing your professional and personal life!

"If you are drawn to take the seminars, just listen to your intuition. You will not regret it! This work is wonderful for your patients/clients, as well as yourself. You will be able to help so many people, people who are desperate because nothing is helping. Each patient is special and unique. Learning the John F. Barnes' Approach to Myofascial Release will give you the techniques, ability and confidence that you need to treat each person as a distinct human being. Myofascial Release is truly a therapeutic art."

MYOFASCIAL RELEASE

JOHN F. BARNES, PT
*International lecturer, author
and authority on Myofascial Release*

John F. Barnes, PT, is a therapeutic 'icon' considered to be a teacher of the highest caliber. He has been teaching Myofascial Release seminars for over 60 years and has trained over 100,000 therapists.

You and I were taught logical theories that explained how various techniques accomplished their goals. Theories are stories we make up in an attempt to explain phenomena. I graduated from the University of Pennsylvania as a physical therapist in 1960. I am a very logical person and accepted the theories taught in school and in scientific texts as factual. My entire belief system was then violently ripped apart in an instant when I experienced a life-changing injury. I had been a good athlete; sprinted the 100-yard dash in track events, threw the shot put, played football, skied, drove motorcycles, swam and excelled at competitive karate and weightlifting. But after being injured, my strength was tested both mentally and physically.

Let me go back to the trauma that changed my life, my belief systems and radically expanded my mind and view of healing. I was training for an upcoming weight-lifting competition and went to the gym to work out. There was no one else there to help "spot" me. I was doing high repetition squats with more than 300 pounds, and I got to the point where I couldn't get up from my last repetition. I had been a gymnast when I was younger, so, I decided to do a "back roll" to get out from under the weight, forgetting that when your hands are grasping a bar with more than 300 pounds on it, your hands can't let go. I crashed on the ground with tremendous force, herniating the disc at L5 and ripping my lumbar ligaments. I laid on the ground stunned and unable to move.

I felt numb from the waist down. After the numbness and shock subsided, the pain began to run through my body, and my body shook violently. In that horrible instant, the things I loved most—motion and competition—were taken from me!

Life became a struggle. I tried every form of therapy available only to be disappointed with temporary results. No one wanted to get better more than me, but I felt trapped by the pain. I was in worse shape than most of my patients. An orthopedist recommended spinal surgery and fused my L5 area. The surgery helped decrease the intensity of the pain, but I still had constant pain, fatigue and limited motion.

There was a point when I realized nobody was going to help me but me. I started to lie on my living room floor and treat myself. I found if I put pressure into the areas that hurt or felt hard, it helped to relieve the pain. However, I was still very strong and was trying to "force" my way through the restrictions. Over time, I learned to be gentler and more patient when I treated my tight and painful areas. I learned the problems were not at the "end range"

as we were taught. The real problems were in the fascial restrictions that lie before the “end range,” which created symptoms, limitation of “end range” and the resultant pain.

As I continued to treat myself, I made such a dramatic recovery that I realized I had stumbled onto something very important. I had to share this knowledge with my patients and fellow therapists. I found as I put sustained pressure into the tightness, I started to have strange sensations that went far beyond the origin and insertion of a particular muscle. I eventually realized that the principles I was developing must be releasing the connective tissue, the fascia. It was during this time I also fully realized how vital the mind-body connection is in the healing process.

I hope to share with you the principles I have developed from my own personal experience and gleaned from clients/patients from around the world over decades. We will explore an exciting new paradigm that is emerging and the important concepts of piezoelectricity, fiber optics, mechanotransduction, fluid dynamics, quantum physics, fractal geometry, complexity and chaos theory, and cellular consciousness.

Health care is undergoing a massive shift, and you and I are the pioneers of an exciting change that will lead to a significantly higher quality of care.

Sincerely,

Soften your visual focus and enjoy the beauty of this translucent hibiscus flower. The fascial system is a fractal system. Take notice of the 3-dimensional web within in this flower, the same as in our bodies.

MYOFASCIAL RELEASE I

This exciting “hands-on” introductory course has trained over 100,000 therapists. Graduates of this course are immediately able to produce positive, structural changes in their patients with acute and chronic pain and dysfunction. These whole-body techniques will be an important added dimension to your existing treatment regimen, greatly enhancing your therapeutic effectiveness.

20 Hour Seminar

“I attended MFR 1 last year in Sedona. My practice is probably 90% MFR and people love it! I believe that the demand for Myofascial Release will do nothing but increase as people learn more about fascia and experience the healing that comes with this work.”

MYOFASCIAL RELEASE TECHNIQUES

- ◆ Theory
- ◆ Anatomy of Fascia & Related Structures
- ◆ Whole Body Inter-Relationships
- ◆ Development of Palpation Skills
- ◆ Evaluation Procedures
- ◆ Lower Extremity Problems

ENJOY A NEW, EXCITING AND LUCRATIVE CAREER!

I have had the opportunity of training over 100,000 therapists and my goal is to help you improve your logical and intuitive abilities and enhance confidence. Trauma and inflammatory responses create myofascial restrictions that can produce tensile pressures of approximately 2,000 pounds per square inch on pain sensitive structures that do not show up in any of the standards tests (x-rays, myelograms, CAT scans, electromyography, etc.)

This enormous pressure acts like a “straightjacket” on muscles, nerves, blood vessels and osseous structures producing the symptoms of pain, headaches and restriction of motion.

Symptoms are the tip of the iceberg of a much deeper, important problem—myofascial restrictions! Science has now discovered what I have been teaching for over 60 years; i.e., pain, dysfunction and disease are caused by a prolonged inflammatory response. Trauma and the resultant inflammatory response create myofascial restrictions that ultimately create the symptoms.

Myofascial Release allows the chronic inflammatory response to resolve and eradicates the enormous pressure of myofascial restrictions exerted on pain-sensitive structures to alleviate symptoms and to allow the body’s natural healing capacity to function properly.

“I was introduced to Myofascial Release at a time in my life when I was considering leaving the profession of massage therapy altogether. My body was in pain from performing traditional massage techniques, such as deep tissue, and I was not helping people as much as I had been led to believe. I was burnt out from trying to force change.”

PATIENT STATEMENT

ONE YEAR OF PHYSICAL THERAPY & MASSAGE THERAPY

“After finding a cancerous tumor in one of my legs, I was a runner left without the use of my left leg. It was both physically and emotionally devastating to lose the use of a limb. I was becoming increasingly frustrated with traditional physical therapy as a means for fixing a poorly functioning leg after surgery and months of not using it. The therapy I was enduring was painful and producing little to no results. I thought there must be something else out there that might help more than the painful pushing and pulling that was occurring nearly daily at physical therapy.

A family member referred me to a Myofascial Release therapist, Rowena Cua. I was immediately impressed by Rowena’s kind nature, warm spirit, and the tremendous amount of knowledge she was willing to share with me about fascia and the John F. Barnes Myofascial Release Approach. Rowena and I have worked together weekly to release scar tissue and trauma and restore the function to my leg. Her care and treatment have been vital to my recovery.”

Her doctors told her that she probably wouldn’t be able to straighten her leg again because they removed so much of her hamstrings from the sarcoma. After Myofascial Release she was able to walk without a limp and straighten her leg, therefore being able to run again!

MYOFASCIAL RELEASE RESULTS

MYOFASCIAL UNWINDING

The Myofascial Unwinding seminar is designed to enhance your skill level and sensitivity providing you with a comprehensive treatment regime. Persistent pain and/or structural dysfunction may be perpetuated by “holding or bracing patterns” in the body. You will learn from the patient’s perspective how unresolved emotional issues or mental concepts that are outdated and are no longer relevant may impede progress. The intermediate “hands-on” Myofascial Unwinding™ seminar will also improve your mental clarity, focus, sensitivity of touch and expand your abilities to achieve consistent results.

20 Hour Seminar—Prerequisite: Myofascial Release I™

“I have been taking courses with John F. Barnes for just shy of 15 years. The changes in my own body and understanding how it works, how my tissues communicate, and how to let go of fear of past traumas and pain have been incredible.”

MYOFASCIAL UNWINDING IS A VERY EFFECTIVE MOVEMENT FACILITATION TECHNIQUE UTILIZED TO:

- ◆ Decrease Pain
- ◆ Increase Range of Motion
- ◆ Eliminate Subconscious “Holding or Bracing Patterns”
- ◆ Increase Your Proprioceptive Awareness
- ◆ Increase Functional Mobility of the Neuro/Myofascial/Osseous Systems

“Myofascial Release (MFR) treatment results speaks for itself! Patient came in Day 1 with complaints of 90% limitations of using her hand because of shooting pain, numbness and tightness. Several cortisone shots and pain meds given in the past with surgery as last resort.

Day 4 of MFR session. What a great progress! Patient was thrilled to report she was able to cut her food and hold utensils to cook!! Patient gives permission to share her story. Who wouldn't, right?! Life changing results in 2 weeks of one-on-one treatment versus 2 years of traditional medicine and therapy. Thank you, John, for continuing to teach and inspiring us.”

“I just attended Myofascial Mobilization this past weekend! I had mistakenly thought the class would be two days of techniques that were contrary to the principles of John F. Barnes Myofascial Release. So, I took all the other seminars and avoided the mobilization workshop — I even took equine first, despite intense uneasiness around horses. Well, whoops, I was very wrong. The techniques are excellent, they do adhere to the ‘no force’ principles.”

PEDIATRIC MYOFASCIAL RELEASE

This introductory “hands-on” workshop is designed for therapists whose primary focus is on the pediatric population. Myofascial Release will be presented for the evaluation and treatment of head injuries, cerebral palsy, birth trauma, scoliosis, movement dysfunction, neurological dysfunction, trauma, pain and headaches.

MYOFASCIAL REBOUNding

Neptune symbolizes water, the fluid (ground substance of fascia) of our body which tends to solidify from trauma and the Trident represents the 3 Pronged MFR Approach.

Myofascial Rebounding utilizes the fluid/energy dynamics as a therapeutic force to greatly enhance your Myofascial Release effectiveness in reducing pain, increasing function and awareness. Myofascial Rebounding also “confuses” the neuromotor system to help free the body of its bracing patterns. It’s kind of a subtle way in the back door. The mind/body doesn’t know what to do, so it just lets go. Myofascial Release and Myofascial Rebounding is an important combination acting as a powerful catalyst enhancing your effectiveness!

“I owe John a lifetime of gratitude. His principles apply not just to therapy, but to life as well. In the past ten years I have been a therapist and a patient; in many ways I have made progress beyond measure. Because of John & Myofascial Release, my life is rich in so many ways . . . Of course, I realize that not every day is going to bring ‘sunshine & rainbows’, but I have confidence now, that whatever the weather may bring, I am going to be more than, ‘just fine.’”

MYOFASCIAL RELEASE III—"BEYOND TECHNIQUE"

The contents of this fascinating seminar will include Advanced Myofascial Release, Cranial and Myofascial Unwinding techniques, visualization, guided imagery and subtle energy techniques; emphasizing the development of your proprioceptive senses for whole body evaluation and treatment.

Bond with fellow therapists as you treat one another to help clear yourself mentally, physically, and emotionally so that you can become true healers.

This powerful and enjoyable experience will allow your essence to re-emerge in a healthy, positive, balanced fashion. This will be done in a supportive, loving environment designed to bring out your full potential to become authentic healers.

I look forward to being with you.

Sincerely,

John F. Barnes, P.T.

THE BEST GIFT I EVER GAVE MYSELF!

Dear John Barnes and all the staff at the Malvern Myofascial Release "Sanctuary",

I want to thank you all for the deeply transformative therapeutic week I spent participating in your 'Therapy for the Therapist' program. I found it to be an amazing opportunity for professional and personal growth. Three sessions of hands-on therapy a day with some of the most talented physical therapists in the world has regenerated me! I haven't felt this good since . . . well, maybe ever! I have been working in physical therapy for 20 years, but never invested 100% of my time and energy toward healing myself, until this week of 'Therapy for the Therapist'. Thanks to Myofascial Release and John, I now know I am worth it. I deserve it. And I need it . . . every year! Everyone does.
